PROJECTS

Online Shopping Platform — *Source Code*

- This project is an online shopping platform built using HTML, CSS, Bootstrap, and the Django framework with SQLite.
- It allows users to browse products, add them to their cart, and check out their orders.

AuthAPI — *Source Code*

- AuthAPI is an authentication API for Django applications that utilises Django, Django Rest Framework, JSON Web Tokens, and PostgreSQL locally.
- It provides functionality for user registration, login, password management, and sending password reset tokens via email.

Django Blog Web Application — *Source Code*

- User Sign up, login and logout(Using the Django authentication system)
- An author can post the blog.
- Every blog has a category, author profile, publish date, and update date.
- The author can change their profile picture.
- Every user sees the profile page, but only the account owner can update their profile information.
